* Does not include non-qualified agricultural land parcels

Agricultural and Forest land map mailing information

What is this? What are these?

- This is the first comprehensive reappraisal of agricultural and forest land in over 40 years.
- The photomaps represent the DOR efforts to identify land use and determine productivity

What do I do with them?

- You should review the maps and bring any concerns to the local DOR office
- If you don't farm the land, arrange for the tenant to review the maps and provide information to the local DOR office

Will this raise my taxes?

- Agricultural and forest land are valued based on productivity, not market value.
- Governor and Legislature are working to mitigate any tax increases.

Where are my maps? I haven't received my maps yet.

- Information is mailed on a county by county basis
- Mailings begin on December 8th
- Continue with about 6 counties per week through February 23rd
- Check the mailing schedule

I own land in two counties and I only received maps for one of the counties.

Where are the rest?

- Information is mailed on a county by county basis
- Mailings begin on December 8th
- Continue with about 6 counties per week through February 23rd
- Check the mailing schedule

Why did I receive more than one packet of maps?

- Information was mailed out based on mailing address not owner name
- Naming conventions make it difficult to consolidate based on name

What am I looking for with these maps?

- Photomaps represent Department understanding of agricultural and forest land classification (land use) and productivity (yield)
- If you see something wrong, bring the maps to the local DOR office
- Landowners have 30 days to bring any concerns to local DOR office

The yield information you show is all wrong. How do I get that corrected?

- Those are the types of concerns that should be brought to the local DOR office
